

Health tea or Pesticide tea ?

The Rationale

Nowadays, more and more people think that drinking green tea is a healthy thing. Are the green tea really good for us and nature? We hope that we can understand the impact of green tea on us and nature by this issue.

The Process

- Reading news about the green tea and the damage cause of pesticide to the people or the environment.
- Finding some information to organizing the label story with group members.

The Findings

- Cardiovascular disease
- Chronic intoxication
- Water and soil pollution

Made in Taiwan. Willy, interesting in growing green teas. After graduating, he started the business. However, he was constantly looking for company cooperation. He found a corporation which collaborated with him. After that, the company sent the product for testing, and found that the pesticide exceeded the standard. The boy lost the trust of the company. He was not only forced to terminate the contract with the company, but also lost lots of money. The land in Willy's hometown was also polluted. The label doesn't tell the whole story...
